

MG VASTR® BUTYL TAPE

VASTR® Butyl tape is a double-sided adhesive sealing tape for adhering membranes to various substrates.

Application

VASTR® Butyl tape can be used for wind, water and airtight connection of membranes to stone, concrete, metal and wooden structures. VASTR® Butyl tape should also be applied under (fabric or compression) lath to ensure a durable waterproofing of the screws or nails.

Installation

VASTR® Butyl tape must be applied to a surface free of dust and grease to ensure proper adhesion. Adhesion of the VASTR® Butyl tape is not possible on frozen or damp substrates. For joints on stone or concrete substrates, it is recommended to pre-treat them first with adhesive primer. Use a silicone pressure roller to adhere the membrane or membrane securely to the VASTR® Butyl tape.

Description	Size	Quantity	Article no.	EAN code
VASTR® Butyl tape	30 mm x 20 m	5 roll / box	8103002000	8714672005233

Specifications

Color Black	Adhesion on steel 30 N / 25 mm
Material Butyl	
Adhesive Butyl	Protective coating Release liner
Temperature resistance - 40 °C to + 90 °C	Processing temperature From 5 °C
Storage Dark, dry, 10 °C to 30 °C
