

# MG VASTR® PVC MEMBRANE

The waterproof VASTR® PVC membrane is a special flexible membrane to prevent moisture from rising between the foundation and masonry. Unlike the VASTR® DPC membrane, the flexible PVC membrane is UV resistant and therefore remains stable in higher temperatures and is weldable. VASTR® PVC membrane has an extremely long lifespan and is also fully recyclable.

## Application

VASTR® PVC membrane can be used for a variety of different waterproofing details in a structure. The membrane is particularly suitable for open structural parts around window frames but can also be used as drainage in cavity walls. VASTR® PVC sheeting is also available welded as lintels. You can process the PVC membrane quickly and easily and is available in any width.

## Benefits

- ✓ 100% Waterproof
- ✓ UV-resistant
- ✓ Available as lateislabbe
- ✓ Recyclable
- ✓ Easy to process
- ✓ Extremely long service life
